

TECHNICAL GUIDANCE

VF-2300 Vortex Flow Sensor

OUTLINE

The VF-2300 Flow Sensor is an improved version of well-received VF-2000 and expands the flow range to 250L/min. The VF-2300 Flow Sensor offers a cost-effective instrument for the measurement of liquid flow.

A simple and compact design makes the VF-2300 a good choice for the measurement of water, pure water, cooling water.

Current output model, Pulse output model and Display model with current / alarm outputs are available. Fitting is selectable from various types according to use.

FEATURES

- ❑ Simple and Compact Design
The VF-2300 Flow Sensor is assembled with a few pieces of components. The sensor body and Shedder bar (vortex generator) are molded as one component. This design approach has reduced the cost as well as the size and weight of the flowmeter. Sensor body is made of PPS (Polyphenylene sulfide) and is designed to eliminate deposits.
- ❑ No Maintenance Cost
Since the VF-2300 has no moving parts, no maintenance is needed.
- ❑ Low Pressure Loss
A combination of straight flow path and Shedder bar gives a lower pressure loss. (27kPa at 200L/min)
- ❑ Various fittings are lined-up
In addition to Taper Pipe Threads (R), TS socket, Flange (JIS 10K), Taper Pipe Threads (Rc) are available.
- ❑ Display Model with Current and Alarm Output
3-digit LED display for flow rate, current output and alarm outputs (2-point) are provided in compact design.
- ❑ CE Marking
The VF-2300 meets the EC directive for CE mark.

OPERATING PRINCIPLE

A bluff body or Shedder bar in the flow generates a street of vortices downstream. The VF-2300 Flow Sensor measures the flow rate by counting the number of vortices with a piezoelectric sensor.

SPECIFICATIONS

Specifications		Model		
		Current Output Model	Pulse Output Model	Display/Current output Model
		VF-2316	VF-2326	VF-2336
Measurable Fluid		Pure water, Water, Low viscosity chemical liquid		
Flow Range *1		25 to 250 L/min		
Accuracy (Additional Error for LED display)*1		±3%F.S.		±3%F.S. (1 digit)
Repeatability		±0.5%F.S		
Fluid Pressure		Body : 1MPa Max.*2		
Fluid Temperature		Body : 0 to 90°C *2		
Ambient Temperature		0 to 50°C		0 to 50°C [Refer to Figure 2]
Ambient Humidity		5 to 90%RH		
Operating Voltage		10.8 to 26.4V DC
